brivo onair®

CLOUD-BASED ACCESS CONTROL AND VIDEO SURVEILLANCE PLATFORM

Brivo OnAir® is a suite of products comprised of our award-winning cloud platform and a complementary array of on premise physical security control devices. System programming and management is accomplished through a standard web browser logged into your Brivo OnAir account. The Brivo OnAir cloud securely communicates with our IT-compliant control devices installed at your facilities over the Internet to download operational instructions and upload event records. All event information is securely stored at commercial-grade data centers for management and reporting purposes.

Brivo OnAir ® Protects Your Enterprise

- Cloud-based infrastructure manages physical security from one to hundreds of facilities
- Remotely control and manage your site on desktop, tablet or phone
- Stay informed of critical events through programmable notiications delivered in real time via email and text
