technical support

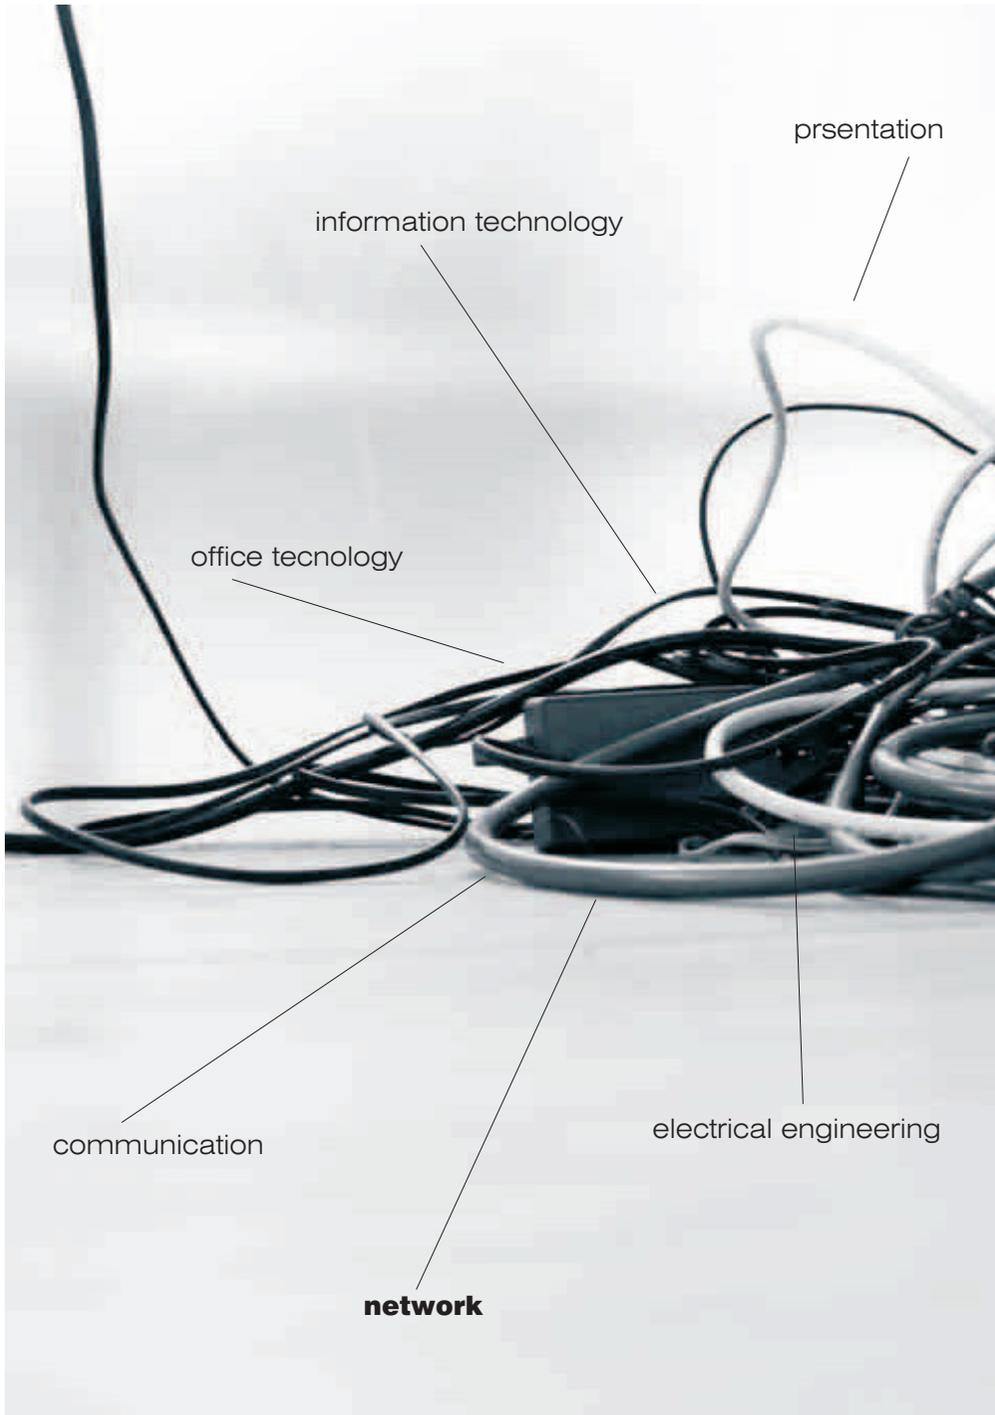

Our years of activity in the most varied of IT branches and electrical engineering enable us today to offer our customers a comprehensive portfolio, which fulfils all requirements and the highest of quality standards. In the following pages, you can learn about the products and services we offer and see how, with us, you can save time, stress and above all, unnecessary costs. We look forward to a successful collaboration, Ing. Hubert Steinhardt and the team of employees at conus GmbH.

PHILO SOPHY

The most varied areas we integrate in our company have one thing in common: Useful is more important than feasible. Our philosophy is: Through full "freedom from intermediaries", we always provide turnkey and operational installations. This can even mean that you as the client do not have to step onto the "building site" once. The planning-installation-maintenance process is common to all areas. We spend a particularly long time on planning your projects as the smooth flow of a project also requires precise project evaluation. We are always concerned about taking any organisational hurdles out of your way. We therefore accommodate your requirements and install at any desired time so as not to disturb operations. We can also advise you on financing your project. Whether it's purchase, leasing or rented – we have the right solution for you. The conus team looks forward to seeing you.

YOUR ADVANTAGES:

- **SINGLE-SOURCE COMPLETE SOLUTION**
- **ABSOLUTE FREEDOM FROM INTERMEDIARIES IN THE AREAS OF:
NETWORK TECHNOLOGY, INFORMATION TECHNOLOGY
COMMUNICATIONS TECHNOLOGY, ELECTRICAL ENGINEERING
PRESENTATION TECHNOLOGY, OFFICE TECHNOLOGY**
- **TURNKEY OPERATIONAL INSTALLATIONS**
- **BEST KNOW-HOW AND LONG EXPERIENCE**
- **24H SERVICE AND CARE**

01

NETWORK

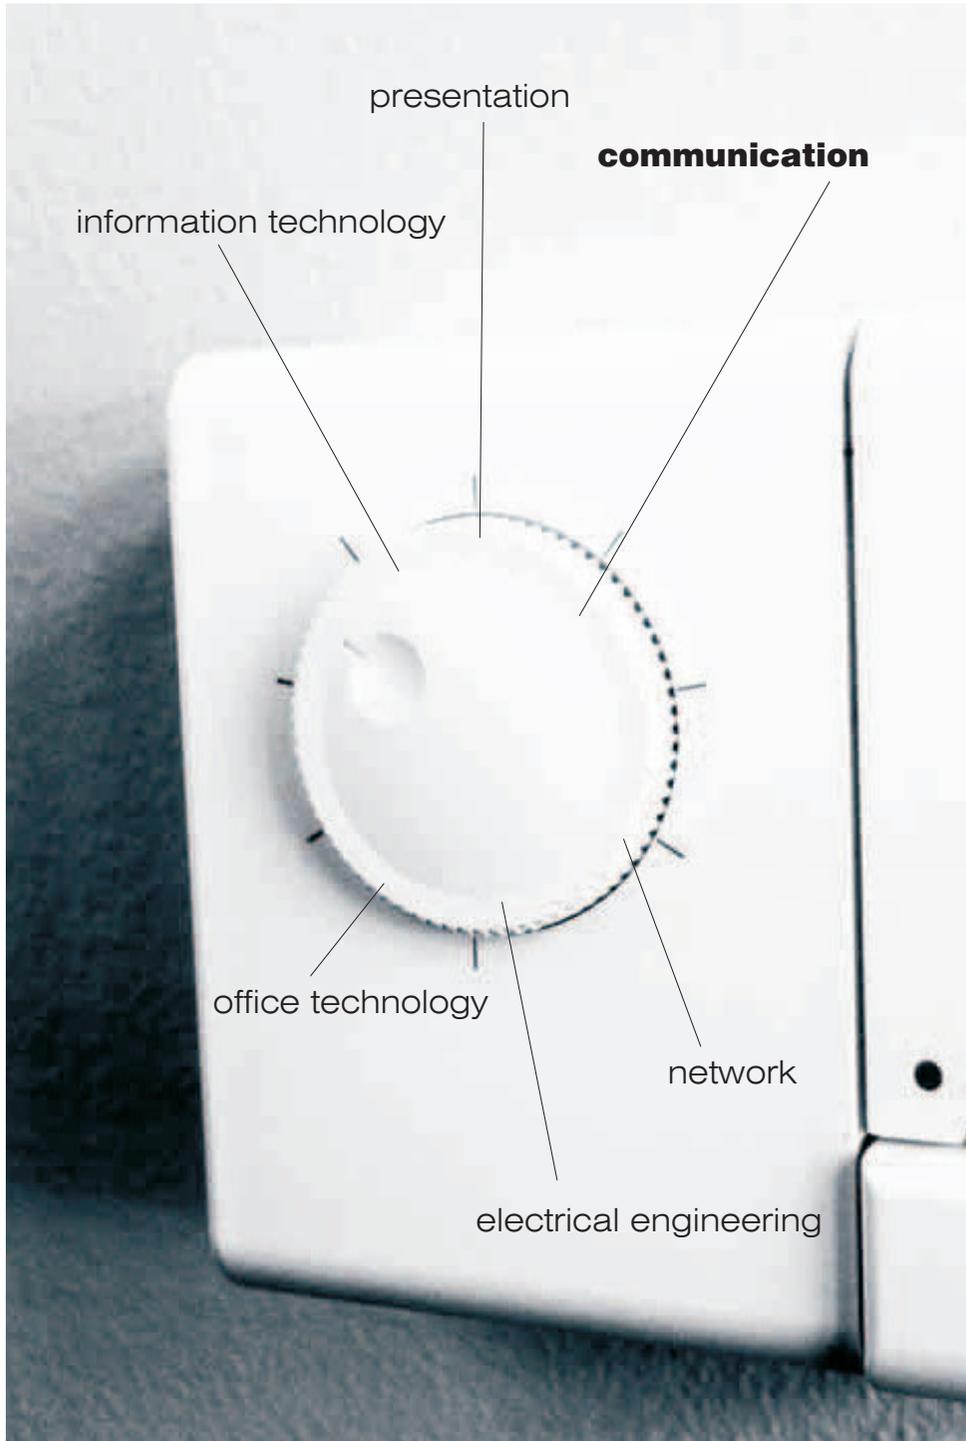

FROM CABLING TO CONTINUOUS MAINTENANCE.
SERVICES: PLANNING_INSTALLATION_MAINTENANCE
AREAS: COPPER/SHIELDED INCL. EARTHING AND PA CONCEPT OR UNSHIELDED_FIBRE/BACKBONE OR FTTD_RADIO_LASER

Since it has become necessary for PC's to communicate with each other and exchange data, we have been carrying out network cabling to create the basis for your company and communications structure. With our turnkey installations, planning & design, installation and assessment/certification are often only the beginning of a longstanding partnership. This is because we also undertake continuous care and maintenance: 24 hours a day, seven days a week.

02 **INFOR MATION TECH NOLOGY**

*TURNKEY STRUCTURES WITH A SYSTEM. SERVICES:
PLANNING_INSTALLATION_MAINTENANCE
AREAS: WINDOWS, LINUX
(PLATFORMS)_SERVER_WORKSTATION_FIREWALLS
AND SECURITY SYSTEMS_BACKUP
SYSTEMS_ACTIVE COMPONENTS*

03 COMMUNI CATION

*THE BEST CONNECTIONS FOR
YOUR SUCCESS.*

*SERVICES: PLANNING _ INSTALLATION _
MAINTENANCE*

*AREAS: CONVENTIONAL TELEPHONY _
VOIP AND INTERNET TELEPHONY _
VIDEO INTEGRATION _ TELEPHONE NETWORKS*

With the continually growing accessibility of information, the need for corresponding communications techniques is also increasing. Flexible, efficient telephone systems are therefore – other than workflow integration – still an important part of what we offer. Whether it is standalone conventional telephone systems or workflow adapted worldwide telephone solutions (with up to three thousand extensions): We plan, install and maintain your whole communications structure.

04 **ELECTRICAL ENGINEER RING**

WE MAKE SOLUTIONS OUT OF CABLES.

SERVICES: PLANNING AND DESIGN

INSTALLATION OR PROJECT MANAGEMENT

CONTINUOUS MAINTENANCE

PRODUCTS: CONVENTIONAL INSTALLATIONS

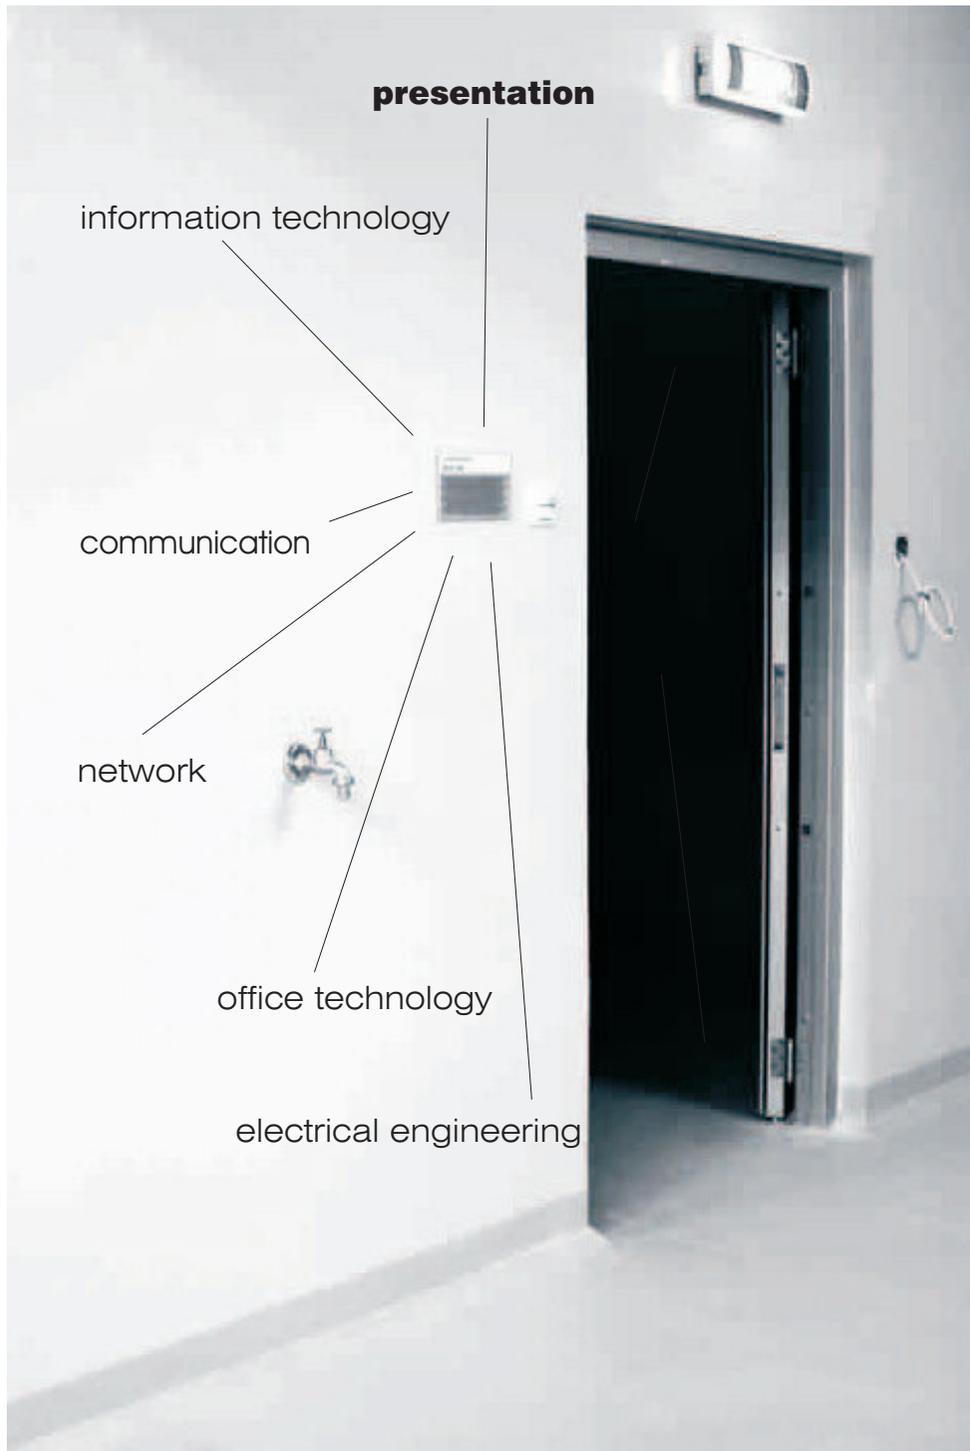

"INTELLIGENT" INSTALLATIONS

BUS TECHNOLOGY

POWER AND RISER STRUCTURES

DISTRIBUTOR AND SYSTEM STRUCTURES

Whether it's a flat or a detached house, single office or office tower, "conventionally installed" or "intelligently controlled": We dimension the supply, plan and design the cabling and carry out the installation. We are one of the leading companies in the area of controlling and "bus technology" focussing on KNX. This is how we automate and network your lighting, heating/cooling, alarm, fire, audio/video, shadowing, ventilation systems and all other systems, formerly standalone installations and devices. We carry out all installations using the latest technology. Since the "modern electrical installation" integrates itself in your environment in the form of screens, switches and devices as fixtures, we also provide a wide range of design components. We also have outstanding know how and sense of responsibility in the areas of standards, regulations and special safety and protection measures. As such, long and strict planning phases in the most complex of systems guarantee the precise and conscientious development of all our installations.

05 PRESEN TATION

DON'T JUST PUT YOUR SUCCESS IN A FAVOURABLE.

SERVICES: PLANNING _ INSTALLATION _ MAINTENANCE

PRODUCTS: AUDIO _ VIDEO INSTALLATIONS AND KNX _ AUDIO/VIDEO COMPONENTS

The perfect integration of high-grade presentation technology requires the maximum technical know how. Finally, networked components from IT, electrical engineering, audio and video technology, sound and lighting systems offer a high performance presentation result. Central controlling for audio/video, sound and lighting situations play just as important a role as the adaptability of space. With you, we design presentation situations, plan and install you presentation systems and take care of adaptation requests.

06 **OFFICE TECHNO LOGY**

WE BRING TOGETHER WHAT BELONGS TOGETHER.

*SERVICES: PLANNING _INSTALLATION_
MAINTENANCE*

We see it as our task to facilitate the optimisation of your workflows and eliminate any weak points. That's why we – in view of "freedom from intermediaries" – also integrate the area of office technology in our services. Whether it is standalone solutions or integrated in company networks – as a supplier of well-known manufacturers we also take on the organisation and installation of office machines.
